Attention: Mr. Gabriel Magwood

Re: Risk-Based Corrective Action Evaluation dated 17 August 2000
SWMU 13-Fire Fighting Training Area (Site Identification # 15405-General File)
Charleston Naval Complex/Charleston Naval Base
Charleston, SC
Charleston County

Dear Mr. Magwood:

The author has completed technical review of the referenced document. As submitted, the report provides a narrative describing previous RCRA investigations at the subject site. This information and data were then utilized in preparing the referenced report in accordance with SCDHEC *Risk-Based Corrective Action for Petroleum Releases* (SCDHEC, January 1998). The analytical results provided indicate that reportable concentrations of VOC and SVOC compounds were detected above established method detection limits in soil and/or groundwater samples obtained at the subject site. The reported compounds are at a concentration(s) which is at or below the RBSL (Risk-Based Screening Levels, SCDHEC *Risk-Based Corrective Action for Petroleum Releases*, 5 January 1998) and/or proposed RFI SSL's (RCRA Facility Investigation site specific levels) for Zone H. Based on the analytical results presented and description of site specific geology/hydrogeology, potential releases, if any, from previous activities at the subject site do not appear to present a significant threat to human health and/or the environment at the present time. In this regard, the employed assessment activities and sampling results appear to indicate that no additional endeavors for remedial actions and/or contaminant characterization is warranted for the SWMU 13 site at this time.

With consideration to the above comments, the Department has reviewed the referenced environmental data. Based on the information and analytical data submitted, the Department recognizes that the Department of the Navy and Charleston Naval Complex has adequately addressed the known environmental contamination identified on the property to date in accordance with the approved scope of work. Please note, this statement pertains only to the portion of the site addressed in the referenced report and does not apply to other areas of the site and/or any other potential regulatory violations. Further, the Department retains the right to request further investigation if deemed necessary.

SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL

Charleston Naval Complex/Charleston Naval Base
