Re: CNB - BLDG X-12 (Former AST)
Site Identification # 01825
Tank Closure Report received 13 July 2001
Charleston County

Dear Mr. Magwood:

The Department has reviewed the referenced report. As submitted, the report documents investigative activities in the vicinity of a former AST. Based on this report, petroleum contamination was identified in excess of established Risk-Based Screening Levels (RBSL) and MCLs. Please submitted a proposal to the Department outlining what assessment methodologies will be employed to evaluate what, if any, risk this contamination poses to human health and/or the environment.

The Department should receive the assessment proposal no later than 17 December 2001. Should you have any questions, please contact me at 803-898-3553 (office phone), 803-898-3795 (fax) or bishopma@columb32.dhec.state.sc.us.

Sincerely,

Michael Bishop, Hydrogeologist
