RE: AST NS 14 (AOC 659 - Zone H)
Site ID # 01311
Work Plan received 6 August 2001
Charleston County

Dear Mr. Magwood:

The Department has completed technical review of the referenced document. As submitted, the plan provides for additional investigative activities to determine the extent and severity of contamination associated with a release from the referenced AST. Based on the information provided, the proposal to perform soil and groundwater sampling is approved for implementation with the following amendment:

- According to Department files, a closure report for AST NS 14 was received 12 April 1999. This report is not referenced in the submitted work plan. The closure report documented soil contamination in excess of established regulatory limits. Therefore, soil *and* groundwater sampling will be required as part of the additional investigative activities. Soil and groundwater sampling should be conducted in the vicinity of former soil samples 99SPORT093-2 and 99SPORT0093-3.

Please submit a work plan addendum outlining the proposed locations for the soil borings and monitoring wells. Once the locations have been approved, The Department will issue the required well installation permit. The addendum should be received no later than 28 September 2001.

Should you have any questions please contact me at 803-898-3553 (office phone), 803-898-3795 (fax) or by e-mail bishopma@columb32.dhec.state.sc.us.

Sincerely,

Michael A. Bishop, Hydrogeologist
