Excavation Work Plan received 23 April 2001  
Charleston County

Dear Mr. Magwood:

The Department has completed technical review of the referenced document. As submitted, the Work Plan (CAP) provides an outline of soil excavation activities designed to remediate hydrocarbon contamination at the referenced facility.

The request to initiate soil excavation activities in the vicinity of AST 2513-A is approved. However, confirmation sampling of the excavation will be required prior to backfilling. It is expected that two representative soil samples be obtained and analyzed for the appropriate parameters (VOCs & PAHs) for verification.
