Re: Zone G/ Fuel Distribution System; Area 19 (01189)  
SCHEC response letter dated 18 November 2001

Dear Mr. Bishop:

In the SCDHEC response letter for Area 19 dated 18 November 2001, the comment was made that "the CAP indicates that a well should be located to the east of Building 0098 and one should be located closer to former AST 148". A response to the comments can be found below.

**Comment:** Well located east of Building 0098.

**Response:** For the well east of Building 0098, CH2M-Jones, LLC recommends using monitoring wells FDSGW19C and FDSGW19B (Figure 1).

**Comment:** One well should be closer to former AST 148.

**Response:** A well was not installed closer to former Building 148 because the soil delineation samples did not extend that far north (see Figure 6 of the 10 October 2001 Monitoring Report). The location where the monitoring well was installed is a more representative groundwater sample than the proposed location.

If you have any questions or comments please contact me at 843-740-2780.

Sincerely,

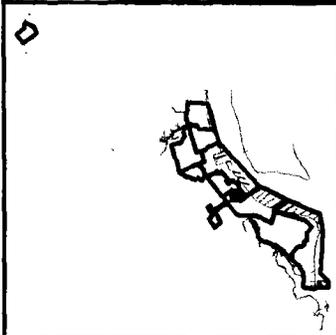

Brian R. Crawford  
CH2M-Jones, LLC
