Re: CNB – Zone G, FDS Area 19
Site Identification # 01189
First Round 2001 Monitoring Report received 8 November 2001
Charleston County

Dear Mr. Magwood:

The Department has completed technical review of the referenced document. Interpretation of the analytical data provided in the referenced report indicates that chemicals of concern remain below established Risk-Based Screening Levels and MCLs. The Department concurs with the conclusions as presented in the report and routine groundwater monitoring and reporting should continue as prescribed in the Corrective Action Plan dated April 2001.

Review of the referenced report also reveals that the post excavation monitoring wells do not appear to be aligned with known contamination locations. Review of the CAP indicates that a well should be located to the East of Building 0098 and one should be located closer to former AST 148. Please provide justification for placement and quantity of the monitoring wells. Questions concerning the placement and quantity of monitoring wells should be resolved prior to the next sampling event.

Should you have any questions, please contact me at 803-898-3553 (office phone), 803-898-3795 (fax) or bishopma@columb32.dhec.state.sc.us.

Sincerely,

Michael A. Bishop, Hydrogeologist
