Re: **Conditional Approval of Draft Final Sampling and Analysis Plan for Remedial Investigation of the Incinerator Disposal Site, dated August 2010**  
**Acknowledgment of Receipt and Notice to Proceed**  
Incinerator Disposal Site  
U.S. Department of the Navy, Naval Auxiliary Landing Field Cabanis  
Corpus Christi, Texas  
TCEQ Facility ID No. T1983  
Customer No. CN600621155 Regulated Entity No. RN104647466

Dear Mr. Syme:

The Texas Commission on Environmental Quality (TCEQ) has received your proposed Draft Final Sampling and Analysis Plan for Remedial Investigation of the Incinerator Disposal Site, dated August 2010. Please be aware that all closure/remediation activities associated with this site must be conducted in accordance with the directives contained in this correspondence, 30 TAC §335.8 and 30 TAC §350. Authorization to proceed with the above referenced workplan is granted under the condition that the vanadium project action limit and project quantitation limit goal for groundwater are adjusted. The project action limit for vanadium is based on the groundwater ingestion protective concentration level which has decreased to 0.0017 mg/L.

Upon completion of the assessment activities one of the following Remedy Standards must be selected:

- A. According to 30 TAC §350.32(d), activities conducted to achieve Remedy Standard A do not require TCEQ approval prior to implementation; however, the Affected Property Assessment Report (APAR), any Response Action Effectiveness Reports (RAER), and the Response Action Completion Report (RACR) are subject to TCEQ technical review. A Self-Implementation Notice (SIN) form should be submitted no later than 10 days prior to conducting the response action(s). Please use the standard reporting forms found at <http://www.tceq.state.tx.us/remediation/trrp/trrp.html>.
- B. In accordance with 30 TAC §350.33(d), Remedy Standard B is not a self-implementing standard. TCEQ written approval of the APAR and the Response Action Plan (RAP) must be obtained before commencing corrective action; however, interim corrective measures are authorized and required wherever necessary to protect human health and the environment. Standard reporting forms are available for Remedy Standard B at the web page referenced above.

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Reports documenting closure and/or remediation activities for this release should be submitted according to the time frames provided in 30 TAC §350.31(e) and (f). In accordance with 30 TAC §350.31(d), the TCEQ Central Office and the appropriate TCEQ Regional Office must be notified in writing at least 10 days prior to any confirmation sampling that is done to demonstrate that a response action is complete and a remedy standard has been attained. More detailed information regarding TRRP is available on the TCEQ web page noted above.

Please note that it is the continuing obligation of persons associated with a site or facility to ensure that industrial solid waste and/or municipal hazardous waste are managed in such a way that it does not cause a discharge of waste or an imminent threat of discharge, nor a nuisance or an endangerment to either human health or the environment as required by 30 TAC §335.4. Be advised that the burden remains upon the owner to take necessary and authorized action to correct such conditions whenever they exist.

Questions concerning this letter should be directed to me at (512) 239-2992. When responding by mail, please submit an original and one copy of all correspondence and reports to the TCEQ Remediation Division at Mail Code MC-127. An additional copy should be submitted to the local TCEQ Region Office.

Sincerely,

Chris Siegel, Project Manager  
VCP Team 1, VCP-CA Section  
Remediation Division  
Texas Commission on Environmental Quality
