Final plans for the Oil/Water Separator Assessment, Carswell AFB, are forwarded for your information. Additionally, comment responses from the contractor are also attached. Please note not all your comments have been specifically incorporated into the final plans. This effort is intended to be a preliminary assessment only, and will determine the condition of each separator and the absence/presence of contamination.

The results of this assessment will indicate one of two possible conditions. First, there is no evidence of contamination and the disposition of the oil/water separators will be made upon completion of all work. Second, there is contamination at one or more of the separators. If this is the case the separator will either be removed and confirmatory sampling done to ensure there is no further contamination, or, additional investigation is necessary. In either case, you will be notified as to the specific action to be taken with your concurrence/approval.

If you have any questions, please contact the undersigned at (210) 536-5261.

CHRISTOPHER D. HOBBS
Team Chief
Base Closure Restoration Division
