SUBJECT: NAS Fort Worth JRB Proposed Well Installations Agreement for the Temporary Use of Highway Right of Way

As part of our efforts to prevent the southern trichloroethylene (TCE) plume from moving off site at the Naval Air Station (NAS) Fort Worth Joint Reserve Base (JRB), and in accordance with its Draft Work Plan, HydroGeoLogic, Inc., (HydroGeoLogic), is preparing to install two new monitoring/extraction wells on Texas Department of Transportation (DOT) land, near the intersection of White Settlement Road/Roaring Springs Road and Route 183. One well is planned to be located on the grassy rectangle separating the three roads, and the other is to be located in the grassy verge on the northwest side of Route 183, about 50 yards from the corner of Roaring Springs Road (see Figure 1 0, Intersection General Plan, enclosed)

In order to obtain the necessary approval from the DOT for installing the monitoring wells, the Air Force and HydroGeoLogic are required to complete and sign a temporary use agreement, and supply the DOT with a letter of concurrence from the Texas Natural Resource Conservation Commission (TNRCC). Could you please provide us with a letter, addressed to Glen E. Elliott, P E., Director of Maintenance, Fort Worth District, Texas DOT, P.O. Box 6868, Fort Worth, Texas 76115-0868, confirming the need to access the highway right-of-way in order to install the two monitoring/extraction wells.

Thank you for your time and cooperation in this matter. If you have any questions or require additional information, please call me at (512) 386-5425 ext. 20.
