Austin, TX 78711-3087

Dear Mr. Risner:

I have completed a review of the following document, "Final RCRA Facility Investigation Report For Buildings 1015, 1027, 1060, 1064, 1190, 1191, 1194, 1414, 1602, 1643, 3358, 4146, and 4210, NAS Fort Worth JRB, Texas." The following comment is provided:

Section 9, Page 19 of 25 - The report indicates the detection of Cis-1,2-DCE (0.00069 mg/L) and vinyl chloride (0.0022 mg/L) in the groundwater sample from WITCA031 are related to the Air Force Plant 4 TCE groundwater plume. However, the plume map received during the last BCT meeting, dated May 7, 2001 does not indicate the plume is close to this area. Additional monitoring wells were installed, but only sampled for arsenic, barium and manganese. Additional investigation of the potential groundwater contamination should be completed.

Please contact me at (214)665-8306 should you wish to discuss this further.

Sincerely,

A handwritten signature in black ink, appearing to read "Gary W. Miller".

Gary W. Miller, P.E.
Senior Project Manager
Base Closure Team
