Re: Carswell Air Force Base
TNRCC Solid Waste Registration No. 65004
Hazardous Waste Permit No. HW-50289
Final Aerospace Museum Site (AMS) Closure Report
Approval - Risk Reduction Standard No. 1

Dear Mr. Pringle:

The Texas Natural Resource Conservation Commission (TNRCC) has completed our review of the *Final Aerospace Museum Site (AMS) Closure Report* (Final Report) dated September 2001 and received by the TNRCC on October 30, 2001. In addition, the TNRCC also reviewed comments received from EPA Region 6 dated November 6, 2001. The AMS is described as a 12.5-acre museum site located along Spur 341 used for the static display of various aircraft, vehicles, and the storage of equipment. According to the Final Report, closure activities have been completed in accordance with the TNRCC Risk Reduction Standard (RRS) No. 1, pursuant to Title 30 Texas Administrative Code (TAC) Chapter 335 Subchapters A and S.

In order to attain RRS No. 1, all industrial solid waste and municipal hazardous waste and waste residues must be removed or decontaminated from affected media (i.e., soil, surface water, groundwater, air) to naturally occurring background levels. Waste constituents which are not naturally occurring (such as organic chemicals) must be cleaned to the analytical method detection limits. EPA defines these limits as Practical Quantitation Limits - the minimum concentration of a substance that can be measured within specific limits of precision and accuracy under routine operating lab conditions.

The TNRCC has completed a review of the Final Report. Based upon information contained in the Final Report and other information available to staff, it appears that the closure of the AMS has attained RRS No. 1. The Air Force Base Conversion Agency (AFBCA) is released from deed recordation and post-closure care requirements. If applicable, please submit a request in writing to update your Notice of Registration (NOR) to the Registration and Reporting Section at Mail Code MC-129 with a copy of this letter as an attachment.

Mr. Charles Pringle

Please be aware that it is the continuing obligation of persons associated with a site to assure that municipal hazardous waste and industrial solid waste are managed in a manner which does not cause the discharge or imminent threat of discharge of waste into or adjacent to waters in the state, a nuisance, or the endangerment of the public health and welfare as required by 30 TAC §335.4. If the actual closure fails to comply with these requirements, the burden remains upon AFBCA to take any necessary and authorized action to correct such conditions. A TNRCC field inspector may review your Final Report and conduct a closure inspection of the site.

Questions concerning this letter should be directed to me at (512) 239-2360. When responding by mail, please submit an original and one copy of all correspondence and reports to the Corrective Action Section at Mail Code MC-127 with an additional copy submitted to the TNRCC Region 4 Office in Fort Worth. The TNRCC Solid Waste Registration Number and Unit Name should be referenced in all submittals.

Sincerely,

Mark A. Weegar, Project Manager
Team II, Corrective Action Section
Remediation Division
Texas Natural Resource Conservation Commission
