SOUTH MISSISSIPPI SUN/VERNON MATTHEWS

**INCINERATOR SHIP ARRIVES—** The Dutch-owned Vulcanus is tied to the east pier at the State Port of Gulfport on Monday hours after its arrival to pick up the Herbicide Orange stored at the Seabee Center. Air Force personnel will begin dedrumming the 15,000

containers of the toxic chemical on Tuesday, transferring it to railroad tank cars. After the defoliant is loaded on the Vulcanus, which is registered in Singapore, the ship will steam to the Pacific in July for the burn.
