February 26, 1980

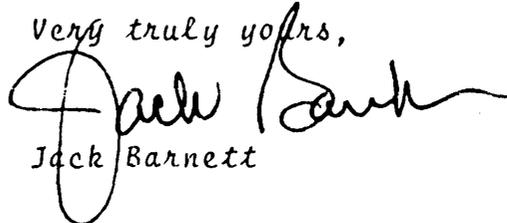

Captain Bob McHugh  
Commander, CBC Base  
Gulfport, MS 39501

Dear Captain McHugh:

As a result of recent publicity, of which I am sure that you are aware, I have had several inquiries as to the status of the Agent Orange problem at the base. Specifically, the question that I have received is whether or not the amount of dioxin that has run off on to civilian properties constitutes a hazard to civilian population of any sort. I would be appreciative if you would be kind enough to answer this question for me or pass this letter on to the appropriate person who could furnish such an answer.

Thank you for your cooperation and your interest in our Mississippi Gulf Coast Community.

Very truly yours,

  
Jack Barnett
