REPLY TO  
ATTN OF: RDV (Lt Rhodes/2942)

15 MAR 1985

SUBJECT: Herbicide Orange Data from Boneyard

TO: Commanding Officer, CBC Gulfport  
Code 470

1. The raw and unvalidated 2,3,7,8-TCDD data from the old Herbicide Orange storage site at CBC, Gulfport has been released by our contractors. Significant levels of TCDD have been found in the current boneyard in use by Supply. A total of 78 samples were analyzed: 4 were negative and 74 were positive. The results range from nondetectable (detection limit of 0.1 ppb) to 164 ppb. If you have any questions regarding this data, contact Lt Al Rhodes at AUTOVON 970-2942.

2. If you have any questions concerning the use of this area and/or the equipment stored on it, please call Lt Col Steve Valder of AFESC/DEV at AUTOVON 970-6232.

ROBERT F. OLFENBUTTEL, Lt Col, USAF, BSC  
Chief, Environics Division
