REPLY TO  
ATTN OF: RDVW

SUBJECT: Herbicide Orange Sampling at CBC Gulfport

TO:  
Commanding Officer, CBC Gulfport  
Code 470

1. Contractors from EG&G Idaho and Ecology & Environment will be returning to CBC Gulfport 8 April 1985. The purpose of this visit will be to collect additional samples of the cement stabilized soil and to pick up equipment for use at Eglin AFB. The contractors will be on site two days.
2. The contractors will follow the same in-processing procedures that were used in January: coordination with security and supply for vehicle and site clearances. Contractors will be operating during normal business hours.
3. Questions should be directed to me at AUTOVON 970-2942.

ALBERT N. RHODES, 2Lt, USAF  
Herbicide Orange Monitor
