 Deloria Stewart

5. SUBJECT
 Agent Orange Cleanup

6. REPRESENTING
 NBC News Atlanta

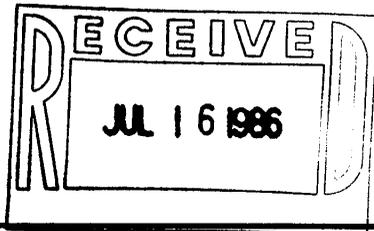

7. REQUEST OR QUESTION

Wanted to know when the clean up of toxic soil here at CBC Gulfport was due to begin.

8. RESPONSE

I told her it was an Air Force project and the dates we had for the equipment to start coming in was the first week of August and it would take approximately 10 days to get the equipment set up before any actual work would begin. I told her to call Maj Heberg at Tyndall for any further information.

1210, 15 July-----I called Maj Heberg to let him know NBC had called and would possibly be calling him. I also asked him about the news article that appeared in the Daily Herald on Friday, 11 July with reference to the August 4 date being published before we were notified. He said EPA had send out a release without coordinating it with them. I asked him to contact EPA and asked that they give us advance copy of any release on the clean up here. Also asked Maj Heberg to be sure to give us a heads up on any information ready for release to the media.
