Re: Work plan for Removal of PCBs (Polychlorinated Biphenyls), Work Plan Addendum, April 1999.

The Mississippi Office of Pollution Control (OPC) has reviewed the above referenced document. The intended remediation with confirmatory sampling to insure that remaining soil PCB concentrations do not exceed 1.0 part per million conforms to environmental concerns of OPC. The workplan is approved.

Please feel free to contact me if I can be of further assistance.

Sincerely,

*Bob Merrill*
