Belinda Gardner
David Hansen
Marie Hansen
Howard Hickman
Helen Jones

Ann Renfroe
Roy Renfroe
Patricia Spinks
Robert Travnichek

Welcome:

Gordon Crane opened the meeting at 6:05 p.m. The purpose of the meeting was to discuss plans for additional sampling in neighborhoods surrounding the Seabee Base.

Residential Sampling Workplan

Bob Fisher of Tetra-Tech NUS presented the plans for additional residential sampling. The sampling plan was conceived as a result of comments and concerns voiced during the public comment period. He explained how the sampling areas would be selected based on: 1) examination of historical map and aerial photographs; 2) identification of areas with potential dioxin contamination from NCBC Gulfport; 3) observations from long-term residents; and 4) consideration of alternative disposal and/or contamination pathways. The sample locations will include areas of likely dioxin contamination, previously unsampled ditches and streams close to NCBC Gulfport, and areas that formerly received (or could have received) stormwater and sediment from the base.
