Re: Remedial Design for Site 10 (Parade Field Ditch), Naval Construction Battalion Center
Gulfport, Mississippi, Draft, May 2007.

The Mississippi Office of Pollution Control (OPC) has reviewed the above referenced document. The document is adequate for the intent and should be issued as final. It is noted that the text (page 5-3, first sentence) states that a Sampling and Analysis Plan will be submitted to and approved by Naval Facilities Engineering Command (NAVFAC SE) before verification sampling begins. Sampling and Analysis Plans should also be submitted to and approved by OPC prior to all sampling efforts, including verification sampling.

We look forward to working with you on this project and will anticipate receipt of the Verification Sampling and Analysis Plan for our approval prior to verification sampling at Site 10.

Please feel free to contact me if I can be of further assistance.

Sincerely,

Bob Merrill
