SUN HERALD

### **Chemical exposure worries base worker**

Now that the government has spent a large sum of money burning the contaminated soil containing Agent Orange at the Seabee Base, I'd like to know if they plan to decontaminate us Civil Service workers who had to wade through it in order to work on the equipment and handle the leaking drums.

When we had to work under the equipment, we laid on plyboards. If we happened to get off the plyboard, our clothes got soaked.

I've heard that some of the guys who worked around it, including myself, are in bad shape.
