and Services Center
Tyndall Air Force Base, Florida 32403-6001

RE: Issuance of a Major Permit Modification
Naval Construction Battalion Center, Gulfport, Mississippi
EPA I.D. No. MS2 170 022 626

Dear Mr. Van Orman:

Enclosed is the Resource Conservation and Recovery Act (RCRA) modified permit to cover those portions of the 1984 Hazardous and Solid Waste Amendments (HSWA) that affect your facility. This Research, Development, and Demonstration (RD&D) permit was modified according to the Statement of Basis and the draft permit previously public noticed on June 8, 1988. The permit modification increased the quantity of contaminated soil to be incinerated from 11,000 to 14,000 cubic yards. Specifically only permit condition III.C. has been changed.

Issuance of this permit modification is in accordance with 40 CFR §124.15. The final permit modification will become effective immediately upon issuance and will remain in effect until August 4, 1989. An administrative review may not be requested pursuant to 40 CFR §124.19 since no comments were received on the draft permit modification and a hearing was not requested.

The applicable RCRA regulations in effect at the time of permit issuance and referenced in the permit shall be complied with throughout the life of the permit, unless the Permittee requests modification of the permit in response to future amendments of the regulations.

If there are any questions concerning the permit, please contact James H. Scarbrough of my staff at (404) 347-3016.

Sincerely yours,

Patrick M. Tobin, Director
Waste Management Division

Enclosures: Notice of Final Permit Modification Decision, RCRA Permit,
Statement of Basis, and Two Public Notices

Major Terry Stoddart, NCBC

NOTICE OF RCRA (HSWA) FINAL PERMIT MODIFICATION DECISION

Facility Name: Naval Construction Battalion Center
EPA I.D. Number: MS2 170 022 626
Location: Naval Construction Battalion Center
Gulfport, Mississippi
Facility Operator: US Navy/US Air Force
Headquarters Air Force Engineering
and Services
Tyndall Air Force Base, Florida 32403-6001

After due consideration of the facts applicable to the above-named facility as they appear in the administrative record and the requirements and policies expressed in the Resource Conservation and Recovery Act (RCRA) and appropriate regulations, I have determined that the Research Development and Demonstration (RD&D) permit modification should be issued with no substantial changes from the tentative determination previously public noticed on June 8, 1988. Specifically, permit condition III.C. is changed from 11,000 cubic yards to 14,000 cubic yards.

The administrative record, with respect to this determination, is maintained at the Agency's offices, 345 Courtland Street, N.E., Atlanta, Georgia 30365 and is available for public inspection between the hours of 8:15 a.m. and 4:30 p.m., Monday through Friday. For further information on this permit action, contact Mr. Leo Romanowski at the above address.

Patrick M. Tobin
Director
Waste Management Division
