RE: Bench Scale Treatability Study Report, Potential Source of Contamination 47,  
Naval Air Station Jacksonville; Jacksonville, Florida

Dear Mr. Robinson

I have reviewed the above document dated April 2007 (received April 16, 2007). The document noted that Z-Loy<sup>®</sup> (submicron/nanoscale iron particles) was effective at reducing chlorinated pesticides in groundwater. This information will be useful as we proceed in evaluating this, and other, sites at NASJAX. The document is acceptable.

Thank you for the opportunity to review this document.

Sincerely,

James H. Cason, P.G.  
Remedial Project Manager
