Mr. William P. Roche, Director
 Environmental Protection Division
 Code 184, Public Works
 Box 5
 Naval Air Station
 Jacksonville, Florida 32212

Dear Mr. Roche:

Duval County - Industrial Waste
 U.S. Naval Air Station Jacksonville
Operation Permit No. IO16-72883

Reference is made to the exfiltration ditch system and operation permit No. IO16-72883.

We understand that the existing treatment and collection system was not designed to treat all the materials now found to be leaching into the ditches. We observed that the exfiltration ditch had been diked and no measurable discharge was present.

According to Mr. D. R. Spell's letter, dated May 11, 1984, the Navy has hired Geraghty & Miller, Inc. to develop a treatment system capable of handling all leachate prior to discharge. It is our intention to issue a construction permit at the appropriate time for the proposed new system.

In the interim, please submit to us a copy of the leachate analysis indicating the concentration of all the materials now known to be present. Additionally, please submit, as soon as possible, what actions may need to be taken prior to any construction in order to protect further deterioration of adjacent ground water.

Mr. William P. Roche
