Dear Ms. Wilson:

The U.S. Environmental Protection Agency has reviewed the Soil Excavation Project Completion Report and the Draft Groundwater Focused Feasibility Study for Potential Source of Contamination 38. EPA has one recommendation for the Feasibility Study base on the remedies evaluated. It is preferable, but not required that ground water monitoring be performed with sufficient data collected to support the selection of one these remedies. The documents are approved as final.

If you have any questions regarding this letter, I can be reached at (404) 562-8508 or at dao.peter@epa.gov.

Sincerely,

Pete Dao
