Mr. Frederick F. Bragdon, Consulting Scientist
ABB Environmental Services, Inc.
Suite 127, 1536 Kingsley Avenue
Orange Park, Florida 32073

Dear Mr. Bragdon:

Thank you for asking our opinion regarding the location of piezometers at OU2. Within the constraints outlined, I would recommend the selection of TP1, TP4, TP5, TP6, and TP8. I am assuming that these piezometers are to be used solely for synoptic water-level measurements.

Had I been involved on the original selection of piezometer sites, I would have recommended sites south and east of the monitor well clusters near the sludge-drying beds, as well as sites to the southwest and north-northeast of the polishing ponds, but those areas are probably beyond the purview of this particular project.

Sincerely,
For the District Chief

William J. Andrews
Hydrologist
