NAVFAC SOUTHEAST

Document: Sampling and Analysis Plan for Munitions Response Program Limited Site Inspections at Fourteen Munitions Response Sites

Volume II, MEC SAP

Naval Air Station Key West, Key West, Florida

Submittal Date 18-Aug-10

Comment Number	Worksheet and/or Page #	Comment	Response
Commenter: Tracie Bolanos, Florida Department of Environmental Protection			
Volume II MEC SAP			
1	All	This is the first time seeing this document and it is already given the label of "Final", but the signature page has not been signed so I will assume that comments will still be provided for this document. Please explain why?	The Draft UFP-SAP was submitted on July 20, 2010. Comments were received from NAS Key West and NAVFAC LANT and are addressed in the August 18, 2010, SAP submittal. Comments from FDEP on Volume II, MEC SAP, will be addressed and change pages will be submitted for any revisions made in response to comments. Once revisions are made, signatures for Volume II of the MEC SAP will be obtained.
2	WS 11	Worksheet # 11, Section 11.4 Develop the Analytical Approach (Step 5): In this section you state, "If no surface MEC/MPPEH or MD are present and no anomalies indicate the potential presence of subsurface MEC/MPPEH or MD, then no further investigation of the site for MEC or MC is required." The Departments position on this matter does not concur with the approach. The Department requires that the soil be sampled to determine if contamination from MEC's are present at the site.	Step 5 of Worksheet 11 will be revised as follows: "If no surface MEC/MPPEH or MD are present, and no anomalies indicate the potential presence of subsurface MEC/MPPEH or MD, then no further investigation of the site for MEC or MC is required."
3	WS 15	Worksheet # 15 is "Worksheet Not Applicable", this may change after details are worked out for Worksheet # 11.	No samples are proposed for collection at the Dredge Spoil Area at Fleming Key and the Trumbo Point Temporary Staging Area during this SI; therefore, Worksheet 15 is not applicable.
4	WS 17	Figure 17-1, What does the sample points labeled "F-XXXX" mean?	The "F-XXXX"s are building numbers of the verified empty and closed magazines present on this portion of Fleming Key. These designations will be removed from Figure 17-1.
