RE: AS/SVE Treatability Study Quarterly Report for Boca  
Chica Flying Club June 2002 to January 2003, Naval Air  
Station, Key West, Florida

Dear Mr. Glover:

I have completed the technical review of the above referenced document dated April 2003 (received April 28, 2003) and find it to be adequate for its intent and approved. The Department does have the following comment:

1. If the concentrations in monitoring well FC-MW-22 continue to increase it will need to be addressed in the future.

If I can be of any further assistance with this matter, please contact me at (850) 245-8998.

Sincerely,

*Tracie Vaughn*  
Tracie L. Vaught
