U.S. EPA Region IV
RCRA Federal Facilities Branch
Attn: James Barksdale
345 Courtland Street N.E.
Atlanta, Georgia 30365

Dear Mr. Barksdale:

On 9 September 1992 a meeting was held between RADM Robertson, Commander, Submarine Group 10, CAPT Ellis, Commanding Officer, Naval Submarine Base, Kings Bay, and CAPT Scullion, Public Works Officer, Naval Submarine Base, Kings Bay and EPA Region IV officials. During this meeting the RCRA Facility Investigation (RFI) presently ongoing at the Old Camden County Landfill site located at Naval Submarine Base, Kings Bay, Georgia was discussed. In particular, we requested Region IV's assistance in expediting review of documents involved with the investigation and cleanup of this site, as well as designation of a central point of contact at EPA. We were later informed, via a telephone call from your office, that Mr. James Barksdale was the EPA Regional IV point of contact for matters involving the RFI including forwarding of all applicable documents.

We are forwarding, for your records and review, the current documents concerning the RCRA Facility Investigation at Naval Submarine Base, King Bay, Georgia. The Technical Work Plan Interim Corrective Measure Screening Investigation (Site 11 RCRA Facility Investigation) is in final draft form and we are presently soliciting comments from Georgia Department of Natural Resources.

SUBASE point of contact concerning this submittal is Mr. John Garner, P.E. (912) 673-4759.

Sincerely

Encl:
