Atlanta, Georgia 30360-2824

March 2, 1993

Mr. Ed Lohr  
Department of the Navy  
Southern Division Naval Facilities Engineering Command  
2155 Eagle Drive  
Charleston, South Carolina 29418

31547.000  
16.01.00.0003

Dear Mr. Lohr:

Thank you for allowing Bud Zehner and me to attend the briefing February 12, 1993, regarding the NSB Kings Bay, Georgia environmental investigation. Your primary consultant, ABB Environmental, Inc., provided an excellent synopsis of work conducted thus far at the installation.

I had hoped that time would permit us to more fully discuss assistance that the Georgia District Office of the U.S. Geological Survey may provide to Southern Division Naval Facilities Engineering Command (SOUTHDIV) at NSB Kings Bay. The U.S. Geological Survey has offered the assistance of our Water Resources Division in the completion of your mission. Our scientists are highly trained in every aspect of environmental evaluation and can provide SOUTHDIV with unparalleled support.

Representatives from our Georgia District Office and Mr. Bruce Campbell plan to visit SOUTHDIV on March 10 for a meeting with Mr. Brandon Works. If this date is convenient to you, we could discuss areas where the U.S. Geological Survey may support your mission at NSB Kings Bay.

I have enclosed for your use several USGS topographic maps covering the NSB Kings Bay area, and water-level hydrographs for our observation well (33E027) located on the base.

Please give me a call if this date is workable, or to set up another date for an informational meeting. Also, please let me know if I may be of any additional service (404) 903-9100).

Sincerely,

*Woody*

David W. Hicks  
Hydrologist

*Need certification that  
there is a confining layer  
at 100'± Below Surface.  
Economic Act*
