RE: Notice of Need for Corrective Action
Site 11 - Old Camden County Landfill

Dear Sir:

Based on the results presented in the Interim Corrective Measures Screening Investigation Progress Report, it has been determined that VOC contamination is present within the surficial aquifer at Site 11, the old Camden County Landfill, and that this contamination has migrated off-site into the Crooked River Subdivision. Corrective Action is thus required for Site 11.

A corrective action plan should be submitted to this office within 45 days of receipt of this notice, in accordance with Condition III.D.2. of Hazardous Waste Facility Permit HW-014(S)(2). The Permittee shall also apply for a permit modification in accordance with Permit Condition III.D.4., to incorporate the corrective action plan into the Permit.

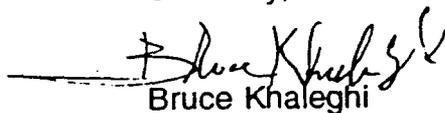

Interim corrective action measures may be conducted to contain, remove, or treat contamination resulting from releases of hazardous constituents from Site 11. Please note that under the conditions of Hazardous Waste Facility Permit HW-014(S)2, Section III. E. 2., the Permittee must notify the Director of EPD at least thirty (30) days prior to implementation of any proposed interim measures. The notice shall include a schedule of implementation of any proposed interim measures.
