January 13, 1994

Mr. Harold "Bud" Zehner
United States Geological Survey
Water Resources Division
Peachtree Business Center
Suite 130
3039 Amwiler Road
Atlanta, GA 30360-2824

Dear Mr. Zehner:

Enclosed is a three volume set of draft final planning documents for the Supplemental RFI, Site 11, Naval Submarine Base, Kings Bay, Georgia. Volume I is the Work Plan, that includes site history information, a description of the investigative approach, and project organization. Volume II is the Sampling and Analysis Plan (SAP). The SAP focuses on the specifics of the field investigation tasks. Volume III is the Health and Safety Plan for the investigation. These documents are presented to you as a courtesy. The Navy and ABB-ES wish to keep the USGS informed of planned events at the site.

ABB-ES hopes that the USGS will assist us in gathering information during the Supplemental RFI by conducting borehole geophysics on two deep wells located in Crooked River Plantation Subdivision. These wells are on private property, so permission to access the wells is a prerequisite to conducting the borehole tests. This topic is addressed in Section 2.2.7 of the SAP.

These documents are being reviewed by the Georgia Department of Natural Resources. The final documents will be prepared following receipt of comments from the regulatory agency. We will forward a set of the final documents to you when they become available.

Sincerely,

ABB ENVIRONMENTAL SERVICES, INC.

Frank Cater, P.E.
Task Order Manager
