Attn: Mr. Billy Hendricks  
Hazardous Waste Management Branch  
205 Butler Street, S.E.  
Floyd Towers East, Suite 1154  
Atlanta, Ga 30334

Dear Mr. Hendricks:

Naval Submarine Base (NSB) Kings Bay, Georgia is pleased to provide you two copies of our Plan for Interim Measure Phase II Upgrades for Site 11, Old Camden County Landfill submitted as enclosure (1). This Plan for Phase II activities focuses on upgrading the existing Phase I IM system in order to more efficiently control migration of the contaminant plume containing volatile organic and semivolatile organic compounds in the groundwater beneath Site 11. This Plan outlines the conceptual design and schedule proposed to meet Phase II IM objectives. Included in this Plan is a brief review of the Interim Measure (IM) concepts and Phase I objectives, objectives for the proposed Phase II activities, a conceptual description of the upgrades proposed for the groundwater extraction (GWE) and treatment system, and several tasks identified to be completed as part of a Performance Evaluation Plan (PEP).

Navy and the Remediation Team are looking forward to implementing this Plan. The implementation of this Plan will effectively be the transition point where cleanup objectives become broader in scope and begin to include all contaminants and media of concern and not just the area along the western boundary of the landfill on which the IM has focused.
