Dear Mr. Khaleghi:

Forwarded as enclosure (1) is the "Summary Report for 1997 Focused Groundwater Investigations at Naval Submarine Base Kings Bay Site 11, Old Camden County Landfill." This summary report is being submitted as an addendum to the Supplemental Resource Conservation Recovery Act Facility Investigation (SRFI). This addendum, together with the SRFI which was previously submitted, completes the requirements of Corrective Action Consent Order Number EPD-HW-1072 for an RFI investigation.

The summary report includes data from two groundwater investigations performed in March 1997 and September 1997. The March 1997 program was focused on providing an updated assessment of the groundwater contaminant levels in the area of the Interim Measure (IM) System and attempting to locate the source area for the tetrachloroethene (PCE) and trichloroethene (TCE). The September 1997 program was conducted to address groundwater data gaps related to delineation of contaminants and to add to the information collected in March 1997. A groundwater sampling event involving approximately 20 wells and piezometers was also conducted in September 1997. This sampling event analytical data will be forwarded to your office upon receiving the results from the offsite laboratory. Please review the attached enclosure and provide comments as necessary.

The SUBASE Kings Bay point of contact on this matter is Ms. Rhonda L. Bath, (912) 673-2001, extension 1217. Please address all correspondence to "Commanding Officer, 1063 USS Tennessee Avenue, Naval Submarine Base, Kings Bay, GA 31547-2606."

Sincerely,

JK-16/4

J. W. MCGONAGILL, P.E.
Lieutenant, CEC, USN
