Dear Mr. Khaleghi:

Please find for your review enclosure (1), the April - September 2002 Semi-Annual Corrective Action Assessment Report for Site 11, Old Camden County Landfill, Naval Submarine Base (SUBASE), Kings Bay as required by SUBASE Hazardous Waste Permit HW-014 (S&T)-3.

This report includes annual appendix IX sampling conducted in August. We would like to move this annual sampling event to November to take advantage of cooler weather.

We would like to discontinue sampling of monitoring wells KBA-11-02, KBA-11-13B, KBA-11-15, and KBA-11-17B, each of which have met the groundwater protection standards for three years. If this reduction in monitoring is acceptable, request permission to properly abandon these wells.

We would also like to reduce the frequency of monitoring of the irrigation well at 102 Plantation Circle from monthly to annually, since this well has met the groundwater protection standards for one year. Our approved groundwater monitoring plan, section 3, allows this reduction in sampling frequency for compliance monitoring wells.

We did not find significant concentrations of cobalt, nickel and naphthalene and would like to discontinue these analyses except at well KBA-11-34 and except for Appendix IX sampling at wells KBA-11-11A and KBA-11-13A.
