Subj: SWMU 29 OILY WASTE PIPELINE
BREAK AND SWMU 46 SIMA ENGINE
DRAIN SUMP, NAVAL STATION
MAYPORT, FACILITY 168626008

Dear Mr. Nuzie:

Naval Station Mayport (NAVSTA) requests your concurrence to officially transfer the management and further investigation of USEPA SWMUs 29 and 46 to Florida's petroleum contamination site cleanup program (FAC 17-770). These SWMUs are already being investigated under this program as the Alpha/Delta Pier Site and Site 1490, respectively. All analytical results received to date indicate only petroleum contamination at these sites; therefore, there is no need to investigate them under the USEPA HSWA program.

If you have any further questions regarding this subject, NAVSTA's point of contact is Cheryl Mitchell (N4E4), at 904-270-6730.

Sincerely,

SCOTT T. CANTFIL
Captain, U.S. Navy
Commanding Officer
