NAVAL STATION MAYPORT ENVIRONMENTAL CLEANUP PROGRAM COMMUNITY OUTREACH

Naval Station Mayport is committed to continuing the community's involvement during its environmental cleanup activities. The Navy is in the process of updating the community relations plan which helps ensure two-way communication between the Naval Station, the regulatory agencies, and the residents, officials, and businesses in the Beaches community.

The Navy is seeking input from the community to develop a successful plan. Information is needed to determine the community's level of interest in the environmental programs, the type and amount of information desired, and the most effective ways to inform and involve the local community in Naval Station Mayport's cleanup activities.

In an effort to obtain first-hand information about the community and to encourage community participation in the program, the Navy is conducting *community member interviews* during October in order to get the community's feedback regarding the environmental cleanup program. If you are interested in participating in the interviews, and would like to be considered as a potential interviewee, please contact Martha Rimmer, Naval Station Mayport, Public Affairs Office at 270- 5226 by October 25, 1996.
