RE: Draft Report of NELP Technology Demonstration Bioremediation of Concrete Surfaces
and Soil at SWMU 14, NAVSTA Mayport

Dear Mr. McGill:

I have reviewed the above document (undated; received October 14, 1996) and offer the following comments which should be considered in preparing the final draft:

1. The final draft report should be properly signed and sealed according to Florida law.
2. I failed to find a discussion of the results of the demonstration including relationships of analytical determinations and Target Levels. I think this is the most relevant portion of this project. This should be included along with an adequate description of sampling events, location of samples, etc. which will allow a reviewer to understand the project.
3. Most of the analytical data summaries were not legible. All analytical data tables should be redone or at least carefully reproduced.
4. The report should include a Summary and Conclusions section and a usable index.
5. Please submit the ABB oversight report with the final draft of the RHS report so that I may review them in conjunction with each other.

If you have any questions, please feel free to call me at 904-921-4230.
