TCE Release Near Building 191

Dear Mr Driggers:

EPA has reviewed the following document:

- o **SWMU for TCE Release Near Building 191 - NAVSTA Mayport, ABB**
Environmental, April 1996.

EPA has no comments on the report. EPA concurs with the conclusions stated in the April 17, 1996 cover letter to the report. The initial recommendation is to concentrate the additional investigation on assessing the nature and extent of the tetrachloroethene release to groundwater and conducting a human health risk assessment. Should the results of the additional investigation indicate that another source area exists, then additional soil sampling should be conducted.

If you have any questions, please contact me at 404/562-8533.

Sincerely,

Martha Berry
Remedial Project Manager
Federal Facilities Branch
