RE: Project to Refurbish the Small Arms Range at Mayport Naval Station

Dear Mr. Weaver:

I have been selected to evaluate the project to refurbish the small arms range at Mayport Naval Station. I have discussed this project briefly with Ms. Cheryl Mitchell at the base during a recent meeting and I have a general understanding of the project. I have also previously discussed this project with you and have received a copy of a letter from you to Mr. Fred Ott dated December 13, 1995 which documents a meeting with the Department which was held on December 12, 1995. This letter summarized four alternatives regarding the project; unfortunately, I have no further information regarding which, if any, of the alternatives are being proposed to be utilized nor do I have the engineering documents and plans for the project. During your absence, I called your office last week and requested information in this regard. I would appreciate receiving the engineering drawings and specifications which clearly documents the proposed project. Following this, I will initiate the reviews and will be back in touch with you.

If you need to discuss this with me, feel free to call me at 850-921-4230.

Sincerely,

James H. Cason, P.G.
Remedial Project Manager
