Subj: FIELD ACTIVITIES FINAL LETTER REPORT; ADDENDUM TO INTERIM
MEASURE WORK PLAN FOR SWMU 7 AT NAVAL STATION MAYPORT,
FLORIDA; PREPARED BY BATTELLE; DATED AUGUST 29, 1997

Dear Jim:

Enclosed for your records is the Field Activities Final Letter Report for bioventing at SWMU 7. The pilot scale test was conducted during June 1997. Results from the soil-gas survey and soil-gas permeability test verify the bioventing system conceptual design--included within the Interim Measure Work Plan, submitted by Battelle on March 27, 1997--is the recommended full-scale system design.

Thank you for your continued assistance with this and other Naval Station Mayport projects. If you have any comments or need additional information, please contact me at (803) 820-5501.

Sincerely,

DAVID M. DRIGGERS, JR., P.E.
Environmental Engineer
Installation Restoration I Branch
