RE: Letter Report: Plume Edge Characterization/Baseline Sampling Event for Monitored Natural Attenuation; Solid Waste Management Unit (SWMU) 14; U.S. Naval Station, Mayport, Florida

Dear Ms. Wilson:

I have reviewed the above document dated July 8, 1999 (received July 9, 1999). The document evaluated petroleum contaminants at the site following ORC application. The Partnering Team also reviewed this project at the meeting on August 4 and recommended that an additional sampling event should be conducted near the end of this year. I concur in that regard and the document is acceptable.

If you need further clarification or any additional information, please feel free to contact me at 850-921-4230.

Sincerely,

James H. Cason, P.G.
Remedial Project Manager
