RE: Final Corrective Measures Study, SWMU 13, Naval Station Mayport, Mayport, Florida

Dear Ms. Wilson:

I have reviewed the above document dated November 2004 (received November 19, 2004). Based on our prior conversations and subsequent upgradient well placement, the previous groundwater Constituents of Concern, iron and manganese, were determined to not be site related and No Further Action has been proposed for the site. I concur with that proposal.

Thank you for the opportunity to review this document. If you require further clarification or other assistance, please contact me at 850-245-8999.

Sincerely,

A handwritten signature in black ink, appearing to read "James H. Cason".

James H. Cason, P.G.
Remedial Program Manager
