RE: Statement of Basis, Solid Waste Management Unit 23 – Jacksonville Shipyards, Inc., Naval Station Mayport, Mayport, Florida, Draft-Final Rev. 2

Dear Ms. Wilson:

I have reviewed the subject document dated June 29, 2007 (received February 18, 2008). My comments concerning this Statement of Basis (SB) for Solid Waste Management Unit (SWMU) 23 are below.

- 1. Summary, Page 1, Column 1:** The seventh sentence should read... "LUCs will restrict the site to non-residential land use only, and will also prohibit any soil disturbance, excavation, or removal activities unless prior written approval is obtained from the NAVSTA Mayport Environmental Department in accordance with the NAVSTA Mayport excavation permit process."
- 2. Summary, Page 1, Column 2:** The first sentence of the second paragraph should read "LUCs for groundwater will prohibit groundwater use/extraction, and will also prohibit any interference with groundwater monitoring systems at SWMU 23". Please make this same change in the **Proposed Corrective Action Section** ("LUCs for groundwater will prohibit groundwater use/extraction, and will also prohibit any interference with groundwater monitoring systems at the SWMU.").
- 3. Summary, Page 1, Column 2:** When discussing the COCs in groundwater please substitute the word "attenuation" for "degradation". This correction should also be made in the **Proposed Corrective Action, Summary of Alternatives, and Recommendations** sections.
- 4. Introduction, Page 2, Column 1:** Please add the CMS as one of the documents where additional details can be found; currently only showing the RFI and CMS Addendum.
- 5. Proposed Corrective Action, Page 2, Column 1:** Please substitute the word "unauthorized" for the word "uncontrolled" when discussing surface soil disturbances. This change should also be made in the **Summary of Alternatives and Recommendations** sections.
- 6. Proposed Corrective Action, Page 2, Column 1:** The first sentence of the first paragraph should read..."The proposed corrective measure for surface and subsurface

- soil includes imposing LUCs to restrict the site to non-residential use only, and it would also prohibit any unauthorized surface and subsurface soil disturbance.”
7. **Proposed Corrective Action Page 2, Column 1:** Please review the present worth cost information in this Section for both soil and groundwater. Any corrections in the text should also be reflected in the Evaluation of Alternatives Tables.
 8. **Facility Background Page 2, Column 2:** In the first sentence of the second paragraph please add “the” between “is” and “former”.
 9. **Facility Background Page 3, Column 1:** In the first paragraph it states that two underground storage tanks may exist. This information should be verified so it is known whether or not the tanks exist. Please revise the text accordingly.
 10. **Summary of Facility Risks, Page 3, Column 2:** Please reword the *Groundwater* description as follows: A comparison to FDEP Groundwater Cleanup Target Levels (GCTLs) concluded that antimony, arsenic, silver and zinc are COCs in groundwater for SWMUs 1, 23, 24, and 25. The human health risk assessment concluded that there are cancer and non-cancer risks to human health associated with hypothetical future residents.”
 11. **Summary of Facility Risks, Page 4, Column 1:** In the Interim Measures portion of this Section please change the word “the” to “an” in the sentence...” In 1998, Bechtel Environmental, Inc. completed an excavation, removal, and disposal...”
 12. **Summary of Alternatives, Page 4, Column 2:** In the *Soil Alternative 2* paragraph the first sentence should be...”This alternative would implement LUCs to restrict the site to non-residential land use only, and it would also prohibit any unauthorized surface and subsurface soil disturbance.” This change should also be made in the **Recommendations Section** (“Soil Alternative 2 would implement LUCs to restrict the site to non-residential use only, and it would also prohibit any unauthorized surface and subsurface soil disturbance at the SWMU.”).
 13. **Summary of Alternatives, Page 4, Column 2:** In the *Groundwater Alternative 2* paragraph the first sentence should be...”This alternative would impose LUCs in the form of a groundwater use/extraction prohibition, and it would also prohibit any interference with...”

Thank you for the opportunity to review this document. If you require additional clarification or other assistance please feel free to contact me at 850/245-8999.

Sincerely,

John Winters, P.G.
Remedial Project Manager
