Subject: Corrective Measures Study Addendum Letter, Area of Concern C
Naval Station Mayport, Jacksonville, Florida

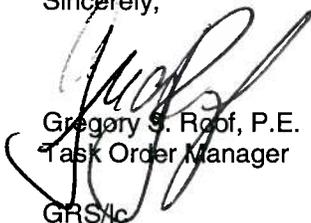

Dear Mr. Syme:

Tetra Tech NUS, Inc. (TtNUS) is pleased to submit this Corrective Measures Study (CMS) Addendum letter for Area of Concern C. This CMS Addendum Letter was prepared for the United States Navy, Naval Facilities Engineering Command Southeast under Contract Task Order 0033 for the Comprehensive Long-term Environmental Action Navy (CLEAN) IV Contract Number N62467-04-D-0055. Members of the Naval Station (NAVSTA) Mayport Partnering Team have been copied as listed below.

The intent of this letter is to clarify the basis for eliminating the detection of dimethoate as a constituent of concern (COC) in the CMS. Dimethoate is an organophosphate pesticide commonly used at the base for pest control; however, per NAVSTA Mayport personnel, pesticides containing this constituent were not stored at this location. Additionally, to the best of the facility personnel knowledge, there has been no reported release of dimethoate in this area. The facility does use pesticides containing this COC in their weed control applications.

If you have any questions with regard to this submittal, please contact me at (904) 636-6125 or via e-mail at gregory.roof@tetrattech.com.

Sincerely,

Gregory S. Roof, P.E.
Task Order Manager
