- RE: Corrective Measures Study Addendum Letter, AOC C, Naval Station Mayport, USEPA ID #FL9 170 024 260, Mayport, Florida (Tetra Tech, February 4, 2011)**
RE: Response to Comments, Draft Statement of Basis, AOC C, Naval Station Mayport, USEPA ID #FL9 170 024 260, Mayport, Florida (Tetra Tech, September 22, 2009)

Dear Mr. Syme:

I have reviewed the subject documents. I received the Corrective Measures Study (CMS) Addendum letter and the Response to Comments (RTC) letter on February 4, 2011 and March 15, 2011 respectively. As stated, the intent of the CMS Addendum letter is to clarify the basis for eliminating the detection of dimethoate as a constituent of concern (COC) in the CMS. After reviewing the data from the CMS Addendum and the letter, I am in concurrence with the Navy and Tetra Tech concerning the constituent dimethoate. It should not be listed as a COC in the CMS Addendum. Also, the Navy's/Tetra Tech's responses to the comments that I provided for the Draft Statement of Basis are satisfactory.

Thank you for the opportunity to review these documents. If you require additional clarification or other assistance, please feel free to contact me at 850/245-8999.

Sincerely, ~

John Winters, P.G.
Remedial Project Manager
