Nashville, Tennessee 37219-5403

Subj: EPA ID #TN2170022600

Dear Mr. Bowers:

In accordance with our draft Corrective Action Management Plan (CAMP) submitted to EPA IV on December 19, 1991, the following response to TDEC comments (that were included as an attachment to EPA IV comments of November 4, 1991) on the RFI workplan for NAS Memphis is provided. We agree with all TDEC comments, except for the comments cited below for which we propose a response for your consideration and concurrence:

Attachment A, Comment II.A.4

We propose to use groundwater monitoring wells, rather than piezometer clusters to determine the piezometric surface and direction of groundwater flow.

Attachment A, Comment V.A.1

In many cases this information may not be developed until the wastes at a site are identified through sampling and analysis. Once a waste has been identified, the appropriate migration and disposal characteristics of the waste will be determined as needed for assessing the need for interim measures or corrective action.

If any additional information is needed, please contact Mr. Mark Taylor of Southern Division, Naval Facilities Engineering Command at (803) 743-0573.

Sincerely,

P. M. MOTOLENICH  
CDR, CEC, USN
