Re: Comments on the Draft Final Community Relations Plan, N.A.S., Memphis, TDSF #79-719, cc. 82

Dear Mr. Porter:

The Tennessee Division of Superfund (TDSF) Memphis Field Office (MFO) has reviewed the Draft Final Community Relations Plan for the NAS Memphis site (Site) received in this office on 7/13/94. TDSF has the following comments.

**General Comment:**

Site descriptions seem too brief with regard to history and physical site descriptions.

**Specific Comments:**

1. Section 3.4 Site Descriptions: Figure 3-1

SWMU Site Location map is illegible as to location designation, a larger map may be necessary.

2. Section 3.4.1.9 SWMU 40-Salvage Yard No. 1.

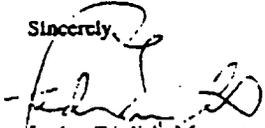

Please include how no evidence of buried waste was determined at this SWMU. Was it historically researched, cursory observed, geophysical determined or combinations of all?

3. Section 3.5.2.12, 13, 14, & 15 - SWMU's 46, 47, 48, & 49.

Please clarify these description with their indications of no evidence of releases. In general, when ground surface is unprotected and there is no engineered containment structures present a release is usually suspected.

Should you have any questions or concerns regarding this review please call at (901) 368-7953

Sincerely,

Jordan English, Manager  
Memphis Field Office  
Tennessee Division of Superfund
