Re: Dye Trace Registration Application - Amendment  
NSA Mid-South, Millington, Tennessee

Dear Mr. Craig:

EnSafe would like to amend the dye trace registration application for Area of Concern (AOC) A located at NSA Mid-South in Millington, Tennessee. EnSafe would like to amend the application to include sodium bromide as an additional tracer. EnSafe proposes to inject a solution of 10 pounds of sodium bromide and 200 gallons of potable water into well 61LF. This solution would result in an approximate solution concentration of 0.5 to 1.0 percent. EnSafe proposes a one time injection at a rate of approximately 2 gallons per minute. All other details of the original application would apply.

For your convenience, I have included a copy of the original application and the Material Safety Data Sheet for sodium bromide. If you have any questions or comments, please call me at (901) 372-7962.

Sincerely,

EnSafe, Inc.
