Re: Summary Status Report
Solid Waste Management Unit (SWMU) 15, Former Fuel Farm Investigation and Area of Concern (AOC) A, Northside Groundwater Substrate Injections, Dated February 5, 2014
Naval Support Activity Mid-South (NSA Mid-South), Millington, TN
Facility Identification Number: TN2170022600

Dear Sir:

The Division of Solid Waste Management (Division) is approving recommendations contained in the above referenced document. This status report contains a summary of the supplemental investigations and interim corrective measures conducted at SWMU 15 and AOC-A between 2012 and 2013. Along with the presentation and discussion of the sampling data; the document contains a recommendation to install five additional monitoring wells at SWMU 15. Groundwater monitoring will continue at AOC-A to evaluate remedy effectiveness of the injection of the carbon substrate to treat contaminated groundwater at the base boundary.

The Division approves the installation of the five additional monitoring wells at SWMU 15. The Division has no comments at this time concerning the field activity conducted at AOC-A. If there are any questions, please contact me at (615) 532-0864 or you may e-mail me at roger.donovan@dnr.tn.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Roger Donovan".

Roger Donovan, P.G.
