Subject: Excavation Summary Report for Additional Soil Remediation at Solid Waste Management Unit (SWMU) 15, January 11, 2006, Naval Support Activity Mid-South, Millington, TN

Dear Mr. Hill,

The Environmental Protection Agency (EPA) has reviewed the subject document. According to the report, approximately 2480 tons of soil were removed from SWMU 15. The confirmatory samples collected during excavation indicate the Navy was successful in removing contaminated soil that exceeds soil clean-up standards. This letter serves as approval for the Excavation Summary Report and work conducted at SWMU 15.

If you would like to discuss further or you have any questions, please call me at 404-562-8513.

Sincerely,

Jennifer Tufts
Remedial Project Manager
